

SIGMA Wireless Gateway

avtronpower.com

AVTRON
POWER SOLUTIONS

Avtron. The Global Leader in Load Banks.

Avtron cutting edge technology enables operators wireless control of more than 100 SIGMA load banks.

SIGMA Wireless Gateway provides wireless control and monitor capability for load test applications.

SIMPLE TEST SET UP

No need to run communication cable between units. Save time during set up by connecting one wireless gateway to each load bank.

COMPLETE WIRELESS SOLUTION

To utilize the full potential of the wireless solution, use the SIGMA Wireless Gateway with our SIGMA Network Pro Software.

SIGMA NETWORK PRO software used with an intelligent wireless gateway, connects and controls any combination of SIGMA load banks.

Use SIGMA Wireless Gateway for the following applications:

DATA CENTER COMMISSIONING

In mission critical environments, precision is key. SIGMA Network Pro connects and controls 100+ load banks to commission HVAC systems, circuit breakers, power distribution and bus tracks from one laptop simultaneously.

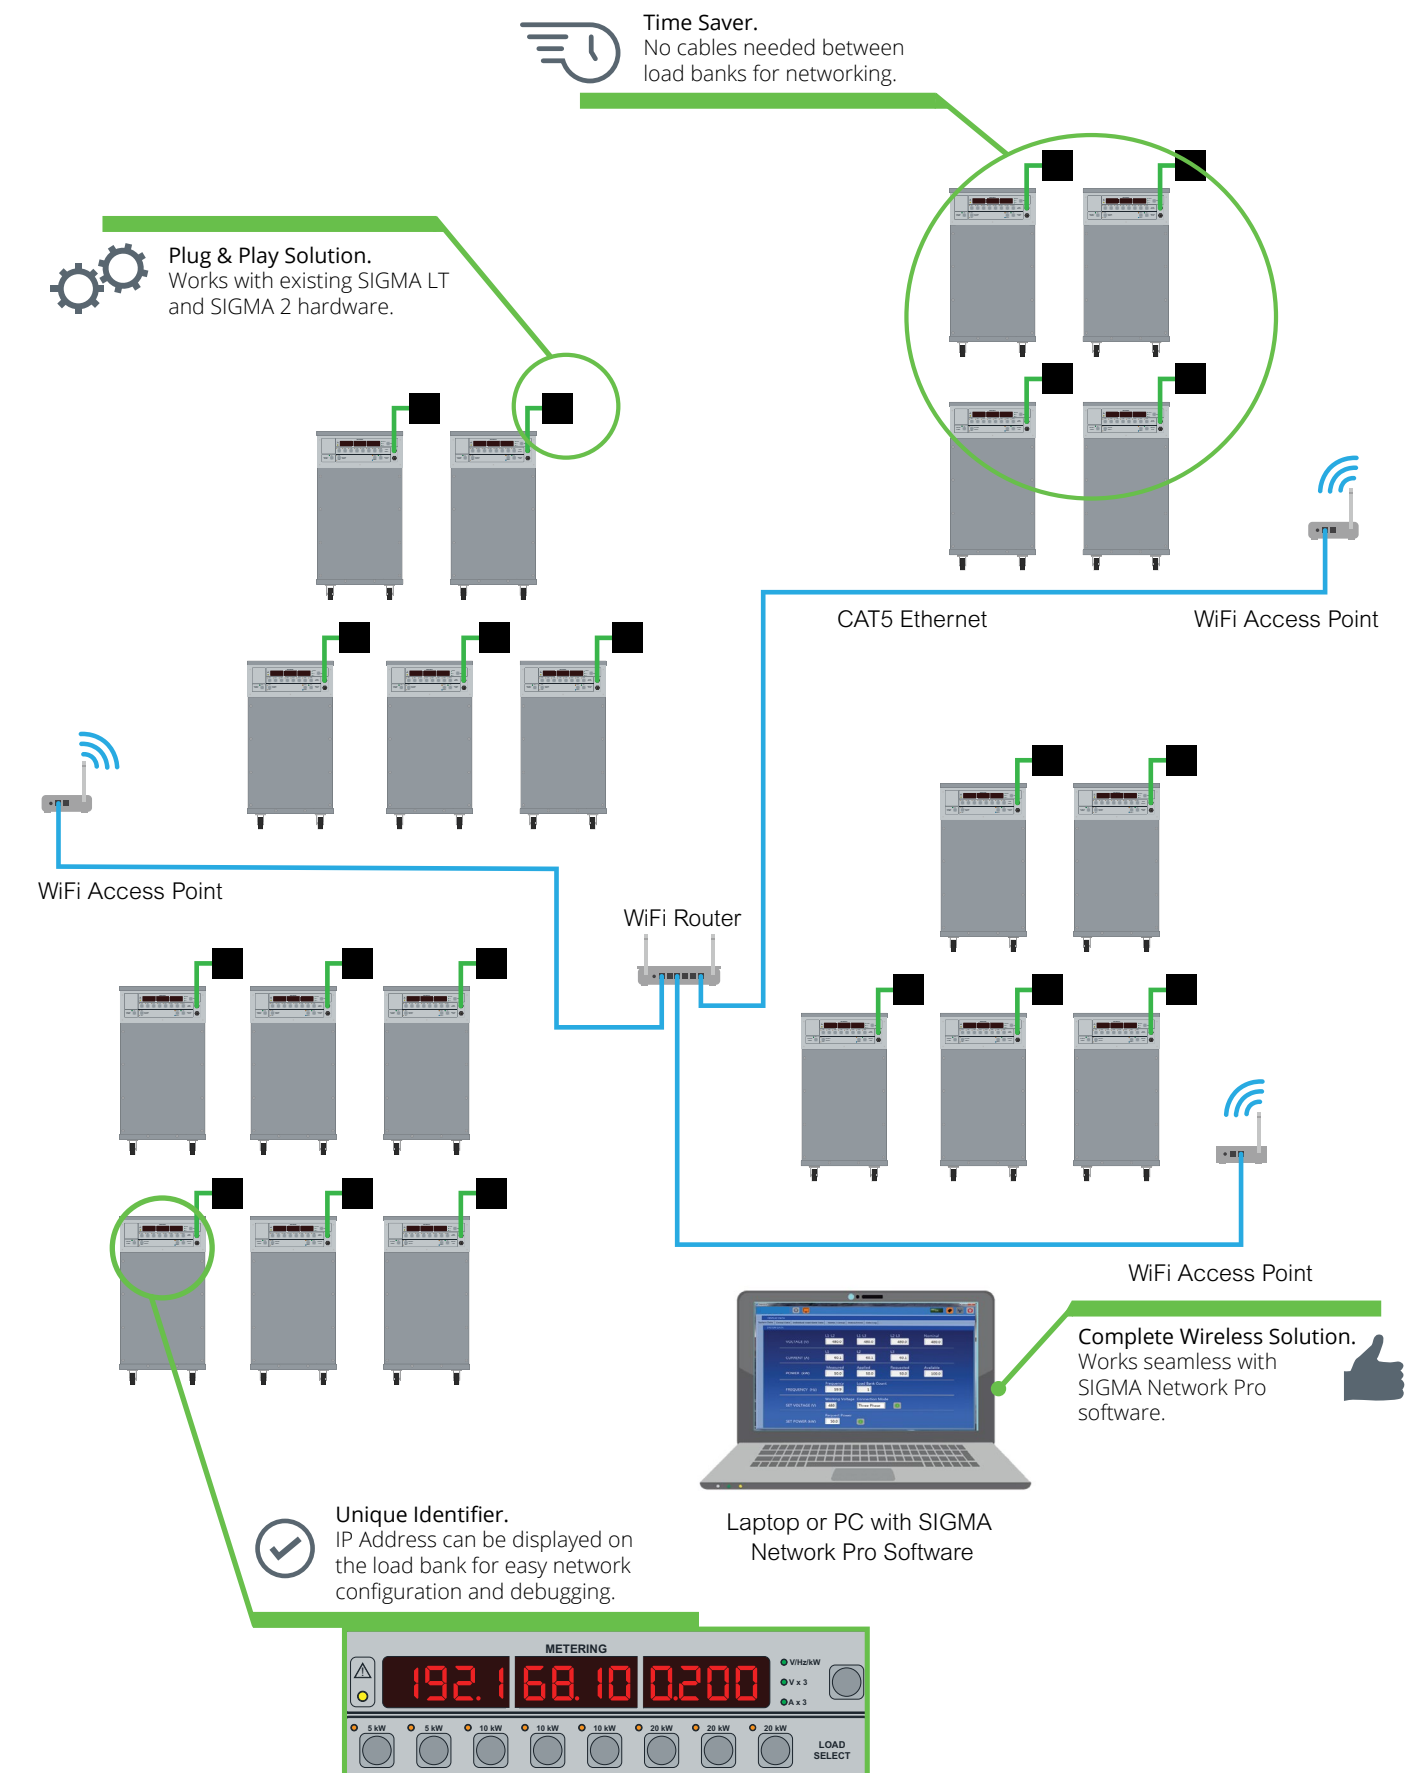

LOAD TESTING RENTAL SERVICES

Adapting to specific applications is vital for rental customers. For large projects requiring many load banks, the intelligent SIGMA gateway system can be used to connect both existing Avtron SIGMA 2 and SIGMA LT load banks in a single network.

COMMERCIAL POWER MAINTENANCE

SIGMA Network Pro allows collective control of many load banks to simultaneously load test multiple back-up power supplies and electrical ancillaries common in commercial facilities.
